4.9	<p><b>Program revision <u>MASTER OF SCIENCE IN EDUCATIONAL TECHNOLOGY</u></b></p> <p>The masters program will be reduced from 36 credits to 30 credits because content integrated into other courses. Deleted EDT 533 and EDT 521; removed EDT 514 from program, but will be offered as an optional course.</p> <p><b>Program Rationale:</b></p> <p>The educational technology program is an applied curriculum based on a balanced approach of theory (knowledge) and hands on (experience). The goal of this approach is for graduate students to develop into educational technology leaders in order to provide leadership and support for teachers and students. They will gain knowledge and experience in the following:</p> <ul style="list-style-type: none"> <li>◆ the instructional design process</li> <li>◆ visual design</li> <li>◆ visual literacy</li> <li>◆ working with a range of software program</li> <li>◆ working with a range of interactive delivery systems (video, audio, print, Web, multimedia, animation, iDVD, and podcasting)</li> <li>◆ applying design and production skills to various instructional outcomes</li> <li>◆ applying assessment rubrics (formative and summative evaluation) to completed instructional-based projects</li> <li>◆ troubleshooting technology problems</li> <li>◆ technology change management</li> </ul> <p>A unique feature of the educational technology program is that all courses build on one another to provide maximum relevance, linkage, and unity. The master◆s program in educational technology underscores the need for competency and mastery for each course to be based on knowledge and performance.</p> <p>Students◆ skills and knowledge will be assessed on how well they are applied to course projects. The performance criteria are as follows:</p> <ul style="list-style-type: none"> <li>◆ content design◆Does the project content reflect sound instructional strategies?</li> </ul>	SEPS GR
-----	---	------------

❖ visual design❖ Does the overall look and appearance of the project capture the learners❖ attention and interest?

❖ technical considerations❖ Are technical decisions such as programming and visual and audio manipulation functional? Does the project work?

❖ evaluation❖ Does the program teach? Is there change in behavior?

Program Learning Outcomes:

Students are expected to:

❖ apply technology skills in the development of instruction;

❖ understand and apply instructional design process;

❖ apply production skills in the development of instruction;

❖ apply evaluation standards to various instructional programs;

The purpose of the Masters Final Project (MFP) is to allow graduate students to complete a comprehensive instructional project. The scope of MFP experience is large and is different from a classroom project. It is meant to act as a synthesis of students' total classroom experiences. It is a culminating experience that allows graduate students to perform their skills in an independent manner. The student must bear the responsibility of the decisions and actions taken at every level of the project. The faculty's role is one of a sounding board and not to influence or provide further training.  
Students in the program cannot begin the MFP without submitting a comprehensive proposal. In addition, students must have completed 24 credits of work before enrolling in the summer EDT 597 Final Project course.  
Computer prerequisite: A valid CCSU BlueNetID (username) and password.
