II. Agenda

- A. List of courses to be deleted – All of the courses have been approved without objections.

- B. Tom explained about the notification of UNIQUE Admissions Standards. Please read the paragraph below for details.

If a new program or program revision requires unique admission requirements, those should be included in the description of the program at the time of submission. A check box will be added to the form to notify Academic Standards and/or Graduate Studies Policy Committee of these new admission requirements (or changes to existing admission requirements). The check box would alert the Chair of the Academic Standards and/or Graduate Studies Policy Committee of the proposal so they could reach out to the Program faculty to ensure that procedure is properly followed.
