

Department of Nursing
Proposed BSN Retention Policy

Once admitted to the BSN program a student must maintain the following standards in order to remain in good standing within the Nursing program:

- a cumulative GPA of 2.7 in all NRSE courses and all related requirements including BMS 206, BMS 216, CHEM 210, EXS 207 and EXS 208 each semester,
- no less than a C+ in each NRSE course, and
- no less than a C in a related requirement.

If any of these standards are not met, the student will be considered in provisional status within the Nursing Program. The student must develop and follow an action plan with his or her academic advisor or the Chairperson of the Department of Nursing.

If less than a C+ is earned in a NRSE course, that course must be repeated in the next fall or spring semester that it is offered and may be repeated only once.

If a student earns less than a C+ in two or more NRSE courses the student will be removed from the Nursing Program.

Effective for Nursing students admitted into the Nursing Program for Fall 2014 or later.
