

## The Board of Regents Research Award Committee Annual Report 2015

### Committee Members:

Martin-Troy, Kathy (Biomolecular Sciences)  
Kurkjian, Catherine (Reading Language Arts)  
Tyson, Ben (Communication)  
Naoumov, Viatcheslav (Engineering)  
Bello, Zakri (Finance Academic)  
Farhat, Joseph (Finance Academic) - Chair

### To: Faculty Senate Members

This year four outstanding researchers from CCSU applied to the Board of Regents Research Award. The committee were delighted to know about the great scholarly work that our colleagues are doing. After considering all the submitted information the committee nominated Dr. Khaled J. Hammad, Associate Professor of Engineering for the award. Dr. Hammad's "impressive publication record" – 23 papers published 2010-14 in an array of fields, including fluid mechanics, heat transfer, energy conservation systems, laser diagnostics, pollution emission control, and Non-Newtonian fluids – was cited as making a substantial impact on both fundamental science and industrial applications.
