A Resolution Concerning the Availability of Course Syllabi Upon Course Registration

WHEREAS Central Connecticut State University has a 4-year graduation rate of 21.5%, which is far below the national average.

WHEREAS the problem with delayed graduation necessitates examination of every option to advance students through their degree.

WHEREAS making course syllabi viewable on Web Central before and during the registration period would give students more information to make a better decision regarding which courses they select.

WHEREAS making syllabi available online in advance to registration is neither expensive nor time consuming.

THEREFORE BE IT RESOLVED that the Student Government Association recommends the Faculty Senate begin the work of uploading course syllabi on Web Central during the class registration period.
