Central Connecticut State University

SENATE ACTION

Senate Motion Number FS 18.19.018B

TO:       President Zulma Toro
FROM:     President of the University Senate

1. The attached motion of the University Senate, dealing with: **Curriculum Committee Report, March 2019** is presented to you for your consideration.

2. This motion was adopted by the University Senate on **03/25/2019**.

3. After considering this motion, please indicate your action on this form, and return it together with the original copy to the President of the University Senate.

4. Under the By-Laws of the University Senate, Section 3.7, the following schedule of action is to be observed.

   a) By **06/10/2019**, Senate action reported to the President of the University. (Within five school days of the session in which they are adopted).

   b) By **06/24/2019**, the President of the University to return the motion to the President of the Senate. (Within ten school days of its receipt).

   **06/10/2019**
   
   [Signature of President, University Senate]

ENDORSEMENT:

TO:    President of the University Senate
FROM:  President Zulma Toro

1. Motion Approved: *Please see my notes on the third page*

2. Motion Disapproved: ____________________ (Explanatory statement must be appended).

3. Action "is deferred": ____________________

4. Resolution Noted: ____________________

5. Other: ____________________

**6/17/2019**

[Signature of President Zulma Toro]
TO: Faculty Senate  
FROM: Beth Merenstein, Chair, University Curriculum Committee  
SUBJECT: Curriculum Committee Report  
DATE: 3/21/19

The following items were approved at the University Curriculum Committee meeting of March 20th, 2019:

1) Announcements

   No new announcements

2) Minor Changes

   A) PE program:

   PE 220 - remove from the catalog (This was done last year but it stills remains in the catalog)

   PE 273 - change from Fall only to Fall and Spring

   B) ATR 502 is Clinical II: Rehabilitation and ATR 503 is Clinical III: Orthopedics. These need to be reversed = ATR 502 --> Clinical II: Orthopedics and ATR 503 --> Clinical III: Rehabilitation

   C) FYE 301 Peer Leadership Seminar, a 2-credit course. Add pre-req language: "Permission of instructor".

3) Consent Agenda:

   a. Please note the following items can also be viewed under the system dashboard and the Full Curriculum Committee Workflow State here: Curriculum Dashboard

4. TAP Programs:

"Geography Pathway Documents 2018-Revised by CCSU Geography 2-14-2019.pdf"

Respectfully submitted,
Beth F. Merenstein,
Chair Curriculum Committee

* The number of faculty lines required will be determined as part of IPC approval of the proposal.
+ Clarification of this specialization would be helpful.
The mission for the Electrical Engineering program is to provide students with a broad and thorough education. A Bachelor of Science in Electrical Engineering fundamentals, applications degree (BSEE) will recruit students from within the State of Connecticut, and design the geographical region. The affordability and accessibility of CCSU will allow a diverse population to gain greater earning potential that prepares them for will in turn promote economic growth.

The core requirements of the proposed BS in Electrical Engineering are standard in the School of Engineering, Science, and Technology. The Electrical Engineering program will build upon two other engineering programs within the School of Engineering, Science, and Technology: Bachelor of Science in Mechanical Engineering and a Bachelor of Science in Civil Engineering.

The educational goals of any engineering field include the awareness of societal impacts and individual responsibility. The decisions made during the practice of electrical engineers at engineering can have far-reaching effects on the professional level with the confidence, safety, health, and skills necessary to meet the technical and social challenges of the future population served and its environment. The emphasis on ethical conduct and responsibility to the larger community, the proposed program provides, will advance and extend the graduate's contribution to civic life in Connecticut's communities.

The BSEE Program will seek accreditation by the Engineering Accreditation Commission of Accreditation Board for Engineering and Technology (EAC of ABET).

Graduates of the Electrical Engineering Program:
1. are technically proficient in the theory and practice of electrical engineering,
2. are effective communicators,
3. collaborate as members of multidisciplinary teams.
5. Collaborate as members of multidisciplinary teams.
4. Understand and demonstrate the need to continue learning throughout their professional careers.
5. Understand the responsibility an engineer bears to society and are characterized by high standards of ethics and professionalism.

The B.S. in Electrical Engineering Program has the following Learning Outcomes:
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, economic factors.
3. An ability to communicate effectively with a broad range of audiences.
4. An ability to recognize ethical and professional responsibilities in mathematics, physics, chemistry, engineering situations, and engineering issues coupled with applications, make informed judgments, which must consider the impact of modern engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering tools, judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

College: SEST

Department: Computer Electronics and Graphics Technology

Total Number of Required Hours: 128

Minor Required: No

Specific Admission Standards: see attached

Is this a graduate program? No

Rationale and Effects

Academic Rationale: The BSEE program will provide students with a broad and thorough education in the fundamentals of Electrical Engineering, applications, and design to prepare them to be practicing engineers. Graduates will apply their skills to meet the technical and social challenges of the future.

Demand Rationale: According to the United States Bureau of Labor Statistics, predicts a 9% growth in employment opportunities for Electrical Engineers between 2016 and 2026. A 2017 survey of Connecticut Manufacturing Workforce Needs by the Connecticut Business & Industry Association (CBIA) shows Electrical Engineers are the third most in-demand occupation and the most in-demand occupation with a specific job title with 1,752 positions open in 2018. Universities in Connecticut graduated 158 Electrical Engineers in the year 2017 causing employers to seek graduates from beyond our region.
Are there impacts to faculty needs?  
(checked)

Changes:  
(unchecked)(checked)

Faculty Effects  
The new program in Electrical Engineering will require 3-4 new faculty lines as well as space to setup 4 laboratories to teach the courses.

Are there impacts to facilities needs?  
(checked)

Changes:  
(unchecked)(checked)

Facilities Effects  
Setup for 4 laboratories

Are there impacts to equipment needs?  
(checked)

Changes:  
(unchecked)(checked)

Equipment Effects  
Some new courses will require additional laboratory equipment

Are there impacts to library needs?  
(checked)

Changes:  
(unchecked)(checked)

Library Effects  
The new courses that make up this degree have modest library requirements.

Are there impacts to computer needs?  
(checked)

Changes:  
(unchecked)(checked)

Computer Effects  
A small number of courses that make up this degree will require additional software licenses.
Does this program lead to teacher certification? (unchecked)

In addition, 2 to 4 credits from GSCI 460 or 4 credits from an external geology field camp approved by the Department Chair are required.

Requirement Type
The following 48 credits are also required as follows:

Requirement Narrative

Course List
GSCI 100 Introduction to Geology - 4 credits
Academic Rationale

For students in the Geology, Environmental Geology, and Planetary Geology BS specializations, the addition of GSCI 260 will be part of a two course sequence (along with GSCI 360 Research Methods) to prepare students for a Senior Project. For students in the Environmental Earth Science and General Earth Science BS specializations, it will be a valuable course to develop communication skills in the Geological Sciences that would be useful in other classes, but more importantly, in the workplace. The statement: "In addition, 2 to 4 credits from GSCI 460 or 4 credits from an external geology field camp approved by the Department Chair are required," was deleted as it was not intended for this program.

Demand Rationale

This course will be required for all Geological Sciences majors.
